

Notes – Meeting 04/13

- Of the two mockups, Mockup B is the preferred choice in basing things off the later design.
- Things that are preferred – structure is really strong, reflects what was talked about last time (one page – the buttons at the top will help to navigate to each section on a singular page)
- Image gallery is really strong – To specify, image gallery will be only images while some of the other images will be replaced by hand-drawn sketches
- The FONT on Mockup B is better because it is easier to read, especially for a younger audience
- Like the usage of the background for the top-most section of the site, creates a strong introduction
- One thing to work on – changing the colors at the top to less saturated options, so that the colors are less intense (applies to both mockups)
- Sketches are coming this week!
